Metropolitan Statistical Area or MSA	Metropolitan Statistical Area or MSA is defined by the United States Office of Management and Budget according to published standards that are applied to Census Bureau data. According to the 1990 standards, each new qualifying MSA must include at least: one city with 50,000 or more inhabitants, or a Census Bureau-defined urbanized area (of at least 50,000 inhabitants) and a total metropolitan population of at least 100,000 (75,000 in New England). Under the standards, the county (or counties) that contains the largest city becomes the "central county" (counties), along with any adjacent counties that have at least 50 percent of their population in the urbanized area surrounding the largest city. Additional "outlying counties" are included in the MSA if they meet specified requirements of commuting to the central counties and other selected requirements of metropolitan character (such as population density and percent urban). For the MSA Fact Sheets, only Missouri counties are used to present the measures.	www.census.gov
